Greetings,

Reclamation will be utilizing a short duration pulse flow release from Flaming Gorge Dam to enhance larval razorback sucker entrainment and floodplain operations in the middle Green River. Releases will be increased beginning Tuesday, May 29th at 7:00 a.m. and returning to power plant capacity (~4,600 cfs) on Thursday, May 31, 2018. Reclamation intends to begin decreasing from power plant capacity after Thursday, May 31st. Details on this plan will be released over the coming days.

Please see the attached schedule for further details on the planned release.

10-day projected flow information for the Yampa River can be found here:

<https://www.cbrfc.noaa.gov/station/flowplot/flowplot.cgi?id=YDLC2&stats=on&pdays=10&fdays=10&showflow=on&showtflow=on>

10-day projected flow information for the Green River at Jensen, UT can be found here:

<https://www.cbrfc.noaa.gov/station/flowplot/flowplot.cgi?JESU1>

(Please note that the Jensen projection linked above may not immediately reflect the scheduled release change detailed herein)

This notification supersedes all previously issued notifications and is current until a new one is issued. All times identified in this notification are in local time and not hour ending.

Current Flaming Gorge data and information can be accessed here: <https://www.usbr.gov/rsvrWater/rsv40Day.html?siteid=917&reservoirtype=Reservoir>
